

Ideation Phase - Brainstorm & Idea Prioritization

Date	Team ID	Project Name	Maximum Marks
18 June 2026		ShopEZ E-Commerce Platform	4 Marks

1. Description

This document outlines the ideation phase, brainstorming sessions, and the prioritization of features for the ShopEZ full-stack e-commerce project. The objective is to establish key user flows and prioritize development sprints.

2. Step-1: Team Gathering, Collaboration, and Selecting the Problem Statement

Brainstorming Ground Rules

- Every team member contributes ideas without immediate criticism.
- Focus on solving standard e-commerce frictions (e.g., slow checkout, confusing navigation, poor order tracking).
- Target Audience: Digital shoppers looking for a streamlined, responsive online shopping interface, and shop administrators seeking a clean dashboard.

Core Problem Statement

Digital shoppers experience high cart abandonment due to complex checkout paths, while administrators lack intuitive tools to update inventories in real-time.

3. Step-2: Brainstorm, Idea Listing, and Grouping

We listed all possible features for ShopEZ and grouped them by component:

Prioritization Matrix

We prioritized features using the MoSCoW method:

- **Must Have:** JWT Authentication, Product Catalog, Search & Filters, Cart Operations, Basic Checkout.
- **Should Have:** Order Status Tracking, Admin Dashboard for Product CRUD.
- **Could Have:** Star Ratings and Review displays, Tax and Shipping calculations.
- **Won't Have (for Phase 1):** Multi-vendor seller onboarding, real-time chats.
