

Ideation Phase - Define the Problem Statements

Date	Team ID	Project Name	Maximum Marks
18 June 2026		ShopEZ E-Commerce Platform	2 Marks

1. Customer Problem Statement Template

User Persona 1: The Online Shopper

- **I am** a busy online shopper who values speed and security when purchasing accessories and appliances.
- **I'm trying to** browse products, apply accurate filters (category, price), and quickly place orders with clear price breakdowns (GST, shipping).
- **but** many online stores have confusing navigation, slow page loads, and hide final costs until the very last screen, leading to checkout fatigue.
- **because** e-commerce systems often lack optimized front-end state management and clear visual hierarchy for product catalog layouts and order summaries.

User Persona 2: The Store Administrator

- **I am** a small business inventory manager.
- **I'm trying to** upload new products, update pricing, verify stocks, and modify order shipping status in real-time.
- **but** existing administrative dashboards are cluttered, require developer assistance to update product models, and do not update statuses immediately.
- **because** back-office tools are often designed as afterthoughts without intuitive CRUD interfaces and solid endpoint protection.
