

User Acceptance Testing (UAT) Template

Project Name	Project Description	Version	Testing Period	Tester Name	Date
ShopEZ E-Commerce	Full-stack MERN application	v1.0.0	15 - 18 June 2026	QA Engineer	18 June 2026

1. Testing Scope

Verified user flows:

- **User Authentication:** Registration, login, validation error styling.
- **Catalog Filtering:** Keyword search, category tabs, price slider queries.
- **Cart Management:** Add to cart, modify quantities, local storage retention.
- **Checkout Operations:** Shipping address fields, payment selections, tax calculations.

2. Test Cases Table

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
UAT-TC-01	User Authentication	1. Navigate to <code>/login</code> . 2. Fill invalid credentials. 3. Submit.	Alert displays "Invalid email or password". User stays on login screen.	Matches expected response.	Pass
UAT-TC-02	User Login Success	1. Fill valid demo email and password. 2. Click Login button.	User redirected to shop, navbar updates with profile indicator and "Logout".	Matches expected behavior.	Pass
UAT-TC-03	Product Price Filtering	1. Slide price max range limit to \$500.	All products with price > \$500 disappear immediately.	Count updates from 24 to 8.	Pass
UAT-TC-04	Cart Persistence	1. Add item to cart. 2. Refresh web browser.	Item remains inside the cart, quantity preserved.	LocalStorage sync successful.	Pass
UAT-TC-05	Checkout Calculation	1. Click Checkout button.	System stores new order, counts 18% GST and	Order confirmation	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
		2. Enter shipping details and submit order.	shipping, redirects to confirmation screen.	screen renders correct total.	

3. Bug Tracking Table

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BUG-001	Price range resets on category switch.	1. Set price to \$500. 2. Click "Groceries" tab.	Low	Resolved	Category query now preserves slider state variables.
BUG-002	Login endpoint times out on invalid MongoDB URI.	1. Disconnect MongoDB. 2. Submit login.	High	Resolved	Added a global 500 database status responder.
